

The Rub & Scrub

The Rub & Scrub is a uniquely designed product that combines and will provide its end user of having a sponge and scrub brush when cleaning surfaces like in your kitchens, bathrooms, or even washing your automobiles. The Rub & Scrub would be designed with two parts that could be attached and or detached by simply turning left or right. The top part of the Rub & Scrub will have a hand grip that allows you to maneuver the product with ease when cleaning. The lower part will be constructed with a sponge and scrub brush bristles on opposite sides. This concept will allow you to use either the brush and or the sponge at your choosing. Whatever part is being used would be exposed to make contact with the surface that you would be cleaning with the other part on the opposite side secured within the top part that's constructed with the hand grip. The Rub & Scrub will be constructed to use multiple and long periods of time before needing to be replace. The Rub & Scrub is a new and innovative concept that will provide you with the convenience of having a sponge and scrub brush available to either use individually or together.
